

Auto Dealership Security Checklist

Where criminals strike first—and how to stop a \$50,000+ loss before it happens

The 3 Places Criminals Hit FIRST at Auto Dealerships

1. Key Storage & Key Control Areas

Once keys are compromised, vehicles leave the lot without force or alarms. Unsecured cabinets, service desks, and valet storage are common targets.

2. Rear Lots & Overflow Parking Areas

Low visibility, poor lighting, and lack of live monitoring make these areas prime targets after hours.

3. Service Bays & Parts Departments

High-value tools, catalytic converters, wheels, and parts are stolen quickly and often discovered too late.

The ONE Weak Link That Costs Dealerships \$50,000+

Passive security cameras without 24/7 monitoring.

Recorded footage does not prevent crime. Without live monitoring, theft happens in real time, law enforcement is called after the loss, insurance claims rise, and repeat incidents occur.

24/7 Security Camera Monitoring That Actually Prevents Loss

We adapt the security cameras you already have in place and connect them to our secure monitoring network. Your cameras are actively monitored 24/7 by licensed security professionals with prior law enforcement and military experience. This provides nonstop protection with trained eyes on what matters most.

Auto Dealership Vulnerability Checklist

- Keys secured in access-controlled systems
- Key movement logged and audited
- Rear lots and service areas fully covered by cameras
- Cameras actively monitored 24/7
- Adequate lighting across all lots and perimeters
- Real-time escalation protocols in place
- Staff trained on security procedures and awareness

FREE Auto Dealership Risk Assessment

A licensed security expert will assess your property, identify vulnerabilities, and provide clear recommendations—at no cost. Your dealership is either being monitored by professionals or observed by criminals.

Call 910-999-8377 (TDSS) to schedule your FREE risk assessment.
